# Our Carrier-neutral Facility Provides Exceptional Security, Flexibility, and Peace of Mind

SECURITY, PERFORMANCE, AND FLEXIBILITY FOR UNRIVALED VALUE

- Private cloud space available in our Carrier-Grade facility

- Multi-layered security system with 24/7 access

- Flexible expansion from private cages or ½ rack of space for true scalability

- Internal and intra-building cross connections with access to all major carriers

- Cages, full or half cabinets with Carrier-Grade power and redundant AC & DC options

IFN provides colocation to enterprise customers and carriers at two secure data facilities. Our carrier-neutral data centers offer the freedom to choose the carriers and service providers that best meet your needs. Our largest location is in the heart of the Indianapolis Carrier Hotel complex at 701 Henry Street, and features a carrier-grade power plant derived from filtered DC power. Our second location is within our headquarters building in northwest Indianapolis.

Colocation and carrier meet point services allow your work to continue uninterrupted through localized power outages, power surges, demand overload, security issues, and other threatening conditions. Our carrier-grade connectivity is state-of-the-art for data backup and disaster recovery.

WE PROVIDE THE TOP TELECOMMUNICATIONS EXPERIENCE, COMMITMENT, AND SERVICE
